How to Charge Your 7- Knobbed Candle

The candle is rubbed in one direction only. If it is to banish, begin at the base and rub toward the tip. If it is for drawing, begin at the top and rub toward the base. The oil may be poured directly on to the candle. Hold your concentration throughout the process and seal the candle when finished with the anointing.

Light candle and let one knob burn completely and put candle out and continue daily to burn on knob a day until candle is complete.

If you are removing something away from you (example reversible candle, uncrossing, etc.) you need to light your candle five minutes passed any hour. (example 5:05, 6:05 etc.) If you are pulling something to you (example success, luck, money, love) you will light your candle fifteen minutes before any hour. (example 4:45, 5:45, etc.)
