How to Charge Your 7 Day Candle

Your candle has already been dressed with the corresponding oil. If you feel that the candle needs more oil just add a few drops of olive oil. Olive oil is an all-purpose oil. With the first two fingers, rub the oil into the wax. If the candle is for banishing purposes rub in a clockwise circular direction. If the purpose is to attract or draw something closer to you, rub in a counter-clockwise circular direction. Concentrate your thoughts on the desired outcome. Continue the operation until you can no longer hold the thought-picture in mind. Finish by sealing the candle with a Solar Cross drawn on the glass with the fore-finger dipped in the oil. ⊕

Wipe hands clean of the oil on a paper or linen towel. If you are doing several candles with different types of oils, clean the hands between operations with a cloth saturated in rubbing alcohol, or one of the sprinkling waters.

If you are removing something away from you (example reversible candle, uncrossing, etc.) you need to light your candle five minutes passed any hour. (example 5:05, 6:05 etc.) If you are pulling something to you (example success, luck, money, love) you will light your candle fifteen minutes before any hour. (example 4:45, 5:45, etc.)
